Hearing Aid Compatibility Status Report (FCC Form 655)

Reporting Period: January 1, 2017 - December 31, 2017

Filing Confirmation Number: 0008048704

Filing Deadline: January 16, 2018

FRN: 0020434767

Filing Date: 01/03/2018 01:58 PM

General Report Information

Type of Company

Service Provider

De Minimis Exception

Did you offer any handsets to subscribers in the United States during the reporting period? Yes

Have you been offering handsets in the United States for at least three years prior to the end of the reporting period? Yes

Date that you began offering handsets in the United States

Are you a small entity? Yes

Were you a small entity at any time during the three years prior to the end of the reporting period?

Date that you ceased to be a small entity?

Company Information

Company Name: Cellular South Licenses, LLC
Brand Names: C Spire
PO Box:
Street Address: 1018 Highland Colony Parkway, Suite 300
City: Ridgeland
State: MS
Zip Code: 39157

Contact Name: Jett Herring
Contact Phone: (601) 974-7158
Contact Fax:
Contact Email: jherring@cellularsouth.com

Filing Agent

Is this report being filed by an agent on behalf of a manufacturer or service provider? Yes

Agent Name: Lukas, LaFuria, Gutierrez & Sachs, LLP
PO Box:
Street Address: 8300 Greensboro Drive, Suite 1200
City: Tysons
State: VA

Contact Name: Pamela L. Gist, Esq.
Contact Phone: (703) 584-8665
Contact Fax: (703) 584-8696
Contact Email: pgist@fcclaw.com

Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that were tested under ANSI C63.19-2007, and that are capable of voice communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007, include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operation?

Yes

Explain:

Do all hearing aid-compatible handsets that were certified only under ANSI C63.19-2007, but that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

Yes

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

Yes

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Service provider websites must include the levels of functionality that the service provider has defined, the level that each hearing aid-compatible model falls under, and an explanation of how the functionality of the handsets varies at the different levels.

Yes

Website address: <https://www.cspire.com/help/hac/hac.jsp>

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Compliant handset models are publicly identified for consumers and audiologists. Compliant models are listed on the company website, and details are on the website answer center, along with frequently asked questions. Retail salespeople are trained to assist with complaint digital wireless phones. Compliant handsets are available through retail locations, website and Telesales. Compliant handsets are available for testing from live phone displays in retail locations. Written materials and promotional literature are provided at the point of sale and on the website, addressing the needs of individuals with hearing disabilities. Such consumers are given a thirty day trial period to try out digital wireless phones to determine whether

they will work properly with their hearing aids.

Methodology for Functionality Levels

Advanced. MSRP at least \$300. Phones classified as advanced generally offer enhanced features such as a higher quality camera, multiple Bluetooth profiles, Internet access, high speed processing, a touch screen interface, email or a Windows Mobile operating system.

Average. MSRP \$150 to \$299.99. Phones classified as average generally offer lower quality cameras compared to advanced models, handsfree and headset Bluetooth profiles, expandable memory, larger phone book capacity, an enhanced color display or increased talk time over basic models. However these phones offer fewer features than advanced models.

Basic. MSRP \$149.99 or less. Phones classified as basic offer the necessary wireless features and may have a lower quality camera and limited Bluetooth or Internet capabilities. Typically, these phones offer smaller phone book capacity and average talk time. Most of these phones are generally larger in size compared to more advanced models and lack features such as MP3 players, expandable memory and download capabilities.

Report Remarks

You have reported the following handset model summary information.

Total number of handsets offered: 25

| Air Interface | Fully Hearing Aid Compatible | | Acoustic Coupling Compatible Only | | Non-Compliant Handsets | | Total by Air Interface |
|---------------|------------------------------|---------|-----------------------------------|---------|------------------------|---------|------------------------|
| | Number | Percent | Number | Percent | Number | Percent | |
| CDMA | 25 | 100% | | | | | 25 |
| LTE | 23 | 100% | | | | | 23 |
| Wi-Fi | 25 | 100% | | | | | 25 |

Dates

This handset model was offered from: 07/17 to 12/17

Ratings

M-Rating: M3

T-Rating: T3

Did this handset meet the criteria for an M3 rating for operations over GSM at 1900 MHz by enabling the user optionally to reduce the maximum power at which the handset will operate by no more than 2.5 decibels, except for emergency calls to 911?
